A little guidance

A bean becomes. · Grade 2 · Parent answer key

Three gentle sessions: 15 minutes each. Understanding matters more than finishing every line.

Math · 1

6 cm taller: 14 − 8 = 6. Bridge through ten: 8 + 2 + 4 = 14.

Math · 2

32 cm tall: 23 + 9 = 32. Add 7 to make 30, then add the remaining 2.

Math · 3

8 elapsed days: 12 − 4 = 8. There are nine labels from 4 through 12, but only eight gaps.

Reading · 1

Stored food inside the seed helps the tiny plant begin, before open leaves make new food. Point to the pale halves in the first plate.

Reading · 2

Their notebook kept an earlier height. Comparing it with today's tip made the slow change easier to notice.

Writing

Accept a drawing, dictation, or 1–3 sentences tied to a scene. Possible idea: The leaf uses light, water, and carbon dioxide from the air to make food.

Wonder first; explanations can wait. Images are simplified, enlarged cutaways, not photographs or a timed growth record. Roots respond to gravity and other conditions; they do not think or see. Seeds need water, oxygen, and suitable warmth; the bean begins with stored food. Green leaves later make food. No real planting is required. Work together and stop when you have had enough.

Materials: pencil, crayons if you like, and scrap paper. Print kid pages separately from this key.
