WONDER DAILY

A bean becomes.

Small, but not empty

A bean rests in an open hand. "Is anything in there?" Inside, a tiny plant waits. Stored food will help it begin before leaves can cook new food.

Down and up

With water, air, and enough warmth, a root tips out first. It grows down with gravity. A shoot climbs toward light.

A new way to make food

Leaves unfold in the light. They use light, water, and carbon dioxide from the air to make food. Now the plant can make more of what it needs.

Too slow to see?

"It looks the same," says Little Wonderer. Big Wonderer opens the notebook. Yesterday's mark sits lower than today's tip. Notes catch slow change.

Look back at the beginning

They look back at the beginning. Did the bean need open leaves to start?

A question to keep

They sit by the window. Growing takes time. "What might change next?" Little Wonderer keeps a new question for tomorrow.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!
