How Rhythm Is Math

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!

A tick to count

Big tapped evenly while Little counted. Each number landed on a steady beat. Counting helped them stay together.

A beat nearby

A drum sounded through the wall. Little felt a heartbeat too. It was steady-ish, not a perfect clock, but it offered a clue.

Teach your rhythm

Little filled four boxes with CLAP, pat, or rest, played the row, and taught the pattern to Big.

Four make a bar

In 4/4 time, one bar has four beats. A louder ONE can show where the group begins again.

Pattern detectives

Rhythm uses sounds and silences across a beat. A rest is counted silence, not a lost beat. Patterns can repeat.

Steady steps

Four beats felt balanced, like left-right-left-right. The sounds changed, but the quiet count stayed steady underneath.
