

WONDER DAILY

The drops that did not fall.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!

A quiet puzzle

Before sunrise, Little Wonderer found tiny drops on a leaf. A spider web beside it wore shining beads. "Did I miss the rain?" Little asked.

The open night

The night had been clear and calm. The leaf gave off heat to the open sky. It cooled and could get colder than the air around it.

Water we cannot see

Air holds water vapor, water in a gas form we cannot see. Air touching the cool leaf cooled too.

Beads on a thread

Tiny drops formed right on the leaf. Water vapor had begun to condense: it changed from a gas into liquid water. That water was dew.

Back into the air

Sunrise warmed the leaf. The beads grew smaller as water began to evaporate: it changed from liquid back into invisible vapor.

Little's instructions

Little checked the order: cool the leaf, let air touch it, then notice dew. "My commands are like a little program," Little said.
