Quiz cards · answer key

Transistors

Q1 · A. Hot glass tubes
Machines used glass vacuum tubes that glowed, got hot and burned out.

Q2 · A. Opens the path
A tiny signal on the middle leg opens or closes the path for a bigger flow.

Q3 · B. In sand
Silicon is found in sand. A sprinkle of other atoms makes it a semiconductor.

Q4 · C. One and zero
A computer treats on as one and off as zero.

C1 · Say it your way
silicon: a material found in sand, used to make transistors.

C2 · Draw it
Look for: Does your sentence tell what you noticed and use because or maybe to explain?

The cards name a key marker such as KEY Q2. Answer positions are shuffled for this sheet, so use the letters on this page, not the order in the web quiz. Print the cards and this key separately.
