WONDER DAILY

Tiny Guests

Guests beyond our eyes

Little Wonderer held a magnifier beside the sink. "Can I see the tiny guests on my hands?" "Germs are far too small for just our eyes," said Big.

A whole little cell

Little paused at a yogurt cup. "Are all bacteria a problem?" "Many are helpers," said Big.

Instructions in a coat

The next guest was much smaller. A virus is a tiny package of instructions in a coat, not a cell. It cannot make copies alone.

A kind habit

Back at the sink, Little made a soft lather. Soap can pull apart the oily outer layers of many germs. It also loosens germs from skin.

Different tiny guests

"Does one medicine work on both guests?" Little asked. Big shook their head.

A clue to remember

"Your immune system is your body's team of defenders," said Big. "Some learn to recognize germs and remember them next time."

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!
