WONDER DAILY

Tungsten Carbide

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!

The ball inside a pen

Little found another clue in a pen. Many ballpoint pens have a tiny tungsten-carbide ball that rolls ink onto paper.

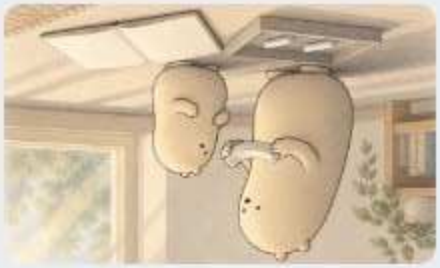

A small tip, a big question

A gray tip rested on a cloth. "Could that little piece do a big job?" asked Little Wonderer.

A line in the soap

Big set soap and a wooden craft stick on a tray. Little guessed what would happen, then watched. Big gently drew the stick across the soap.

A bend and a break

Does every material bend before it breaks? Big gently bent chalk over the tray. It snapped: chalk is brittle.

Hard, tough, or both

Back at the notebook, Big showed a saw-tooth picture. A small carbide tip joined a steel body.

A little grip in the snow

On a snowy walk, Little noticed the tips of their hiking poles. The tip is the small end that meets the ground.

Give the test its words

Tungsten Carbide · Curiosity day

Name _____ Date _____

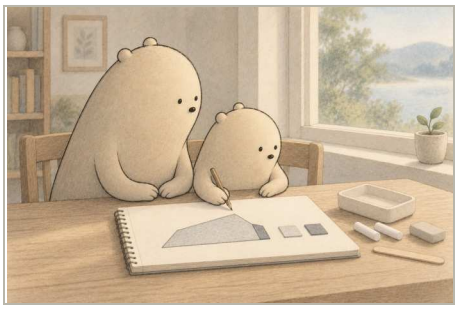

Write one command about the soap test. Say it first if you like.

A line in the soap

A bend and a break

Hard, tough, or both

Draw the scratch Big made in the soap. Add a label.

ask · watch · record · soap · scratch · craft stick · hard · tough

Ask Big to … name one gentle step with the soap and craft stick

Watch the … tell what to notice while Big leads the test

Record the … tell what mark to save in the notebook
