Quiz cards · answer key

Soap Bubbles

Q1 · B. A thin soap-and-water film around air

A soap bubble is a thin watery soap film wrapped around a pocket of air.

Q2 · C. Light reflects in the thinning soap film

Light reflecting in the thin film can make shifting color stripes as thickness changes.

Q3 · A. Surface tension pulls the film into a sphere

Surface tension pulls evenly, and a sphere uses the least film for the air inside.

Q4 · A. The film gets a hole when it thins, dries, or is touched

When the film breaks from thinning, drying, dust, or a touch, the bubble pops.

C1 · Say it your way

evaporate: when liquid water turns into vapor in the air.

C2 · Draw it

Look for: Read your words aloud. Did you connect a clue (color, shape, or pop) to an explanation?

The cards name a key marker such as KEY Q2. Answer positions are shuffled for this sheet, so use the letters on this page, not the order in the web quiz. Print the cards and this key separately.
