WONDER DAILY

Tungsten Carbide

A small tip, a big question

A gray tip rested on a cloth. "Could that little piece do a big job?" asked Little Wonderer.

The ball inside a pen

Little found another clue in a pen. Many ballpoint pens have a tiny tungsten-carbide ball that rolls ink onto paper.

A line in the soap

Big set soap and a wooden craft stick on a tray. Little guessed what would happen, then watched. Big gently drew the stick across the soap.

A bend and a break

Does every material bend before it breaks? Big gently bent chalk over the tray. It snapped: chalk is brittle.

A little grip in the snow

On a snowy walk, Little noticed the tips of their hiking poles. The tip is the small end that meets the ground.

Hard, tough, or both

Back at the notebook, Big showed a saw-tooth picture. A small carbide tip joined a steel body.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!
