

Little Wonderer looks at the bean. "Is anything in there?" A tiny plant is tucked inside. Stored food will help it begin.

WONDER TOGETHER / DAILY

A bean becomes.

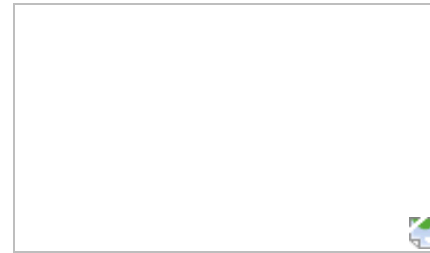

The quiet work of growing

Six small moments. One question to keep.

GRADE 2 / DOGFOOD PREVIEW

With water, air, and enough warmth, the bean starts to grow. A root comes out first. It responds to gravity and grows down. A shoot grows up.

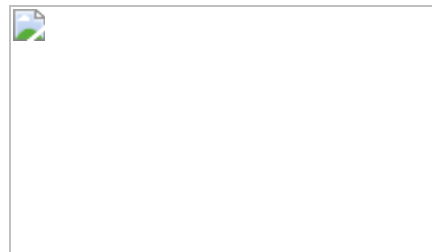

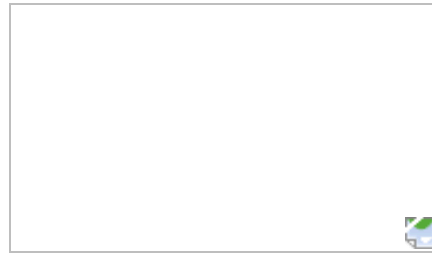

Make a little book.

1. Print one-sided: US Letter, landscape, actual size / 100%. No fit. Headers/footers off.
2. Fold long edge to long edge; reopen. Fold short edge to short edge, then in half again. Open: eight boxes.
3. Cut only the solid center line across the middle two boxes. Keep the outer boxes joined.
4. Refold long edge to long edge, print outside. Push ends together to open a diamond, then a cross.
5. Wrap into a book with page 1 in front. Follow pages 1 to 8.

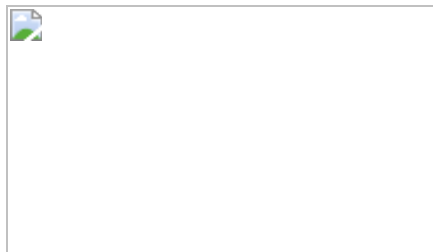

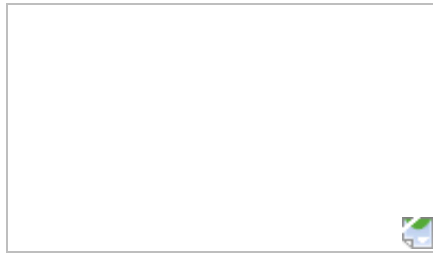

Pictures are simplified and not to scale. Look closely, wonder, and pause whenever you like.

Leaves open in the light. They use light, water, and carbon dioxide from the air to make food. The little plant can make more of what it needs.

They sit together by the window. Growing takes time. "What might change next?" asks Big Wonderer. Little Wonderer has a new question to draw.

"It looks the same," says Little Wonderer. Big Wonderer opens their notebook. An earlier mark is lower than today's tip. Their notes help them see a change.

"Did the bean need leaves to begin?" they wonder. Look inside it again. The tiny plant had stored food before it had open leaves.
