

Six boat counts

What holds a paper boat?

Name _____

Date _____

All numbers are pretend. Show your tens and ones or write your steps.

1. Little gathers 28 pennies, then 17 more beside the tub. How many pennies are ready?

$$28 + 17 = \underline{\hspace{2cm}}$$

Show your thinking.

2. Little has 52 pennies beside the tub and puts 26 away. How many remain?

$$52 - 26 = \underline{\hspace{2cm}}$$

Show your thinking.

3. Little counts 36 folds across several boats, then 27 more folds. How many folds in all?

$$36 + 27 = \underline{\hspace{2cm}}$$

Show your thinking.

Six boat counts

What holds a paper boat?

Name _____

Date _____

All numbers are pretend. Show your tens and ones or write your steps.

4. Little draws 71 drops beside a boat sketch, then erases 38. How many drawn drops remain?

$$71 - 38 = \underline{\quad\quad}$$

Show your thinking.

5. Little draws 24 waterline marks, then follows "Add 19 marks." How many marks are drawn?

$$24 + 19 = \underline{\quad\quad}$$

Show your thinking.

6. A pretend boat voyage lasts 63 minutes. After 28 minutes, how many minutes remain?

$$63 - 28 = \underline{\quad\quad}$$

Show your thinking.
