Six clues to count

The drops that did not fall.

Name _____ Date _____

All numbers are pretend. Draw, use tens and ones, or show your steps.

1. Little counts 38 dew drops on one leaf and 47 on another. How many drops are there altogether?

38 + 47 = _____

Show your thinking.

2. A spider web has 72 dew beads. After sunrise, 38 evaporate. How many beads remain?

72 − 38 = _____

Show your thinking.

3. A leaf has 28 drops. Then 17 more form, and later 19 evaporate. How many drops remain?

28 + 17 − 19 = _____

Show your thinking.

Six clues to count

The drops that did not fall.

Name _____ Date _____

All numbers are pretend. Draw, use tens and ones, or show your steps.

4. Little draws 4 rows of dew beads with 6 beads in each row. How many beads does Little draw?

$4 \times 6 = _____$

Show your thinking.

5. Little has drawn 27 drops and wants 60 in the notebook. How many more drops must Little draw?

$27 + ___ = 60$

Show your thinking.

6. Follow Little’s drawing command: add 5 drops each time. The counts are 12, 17, 22. What count comes next?

$12, 17, 22, ___$

Show your thinking.

WONDER DAILY

The drops that did not fall.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!

A quiet puzzle

Before sunrise, Little Wonderer found tiny drops on a leaf. A spider web beside it wore shining beads. "Did I miss the rain?" Little asked.

The open night

The night had been clear and calm. The leaf gave off heat to the open sky. It cooled and could get colder than the air around it.

Water we cannot see

Air holds water vapor, water in a gas form we cannot see. Air touching the cool leaf cooled too.

Beads on a thread

Tiny drops formed right on the leaf. Water vapor had begun to condense: it changed from a gas into liquid water. That water was dew.

Back into the air

Sunrise warmed the leaf. The beads grew smaller as water began to evaporate: it changed from liquid back into invisible vapor.

Little's instructions

Little checked the order: cool the leaf, let air touch it, then notice dew. "My commands are like a little program," Little said.

Give the leaf an instruction.

The drops that did not fall. · Curiosity day

Name _____ Date _____

Choose one scene below. Write one command sentence for the leaf's story. You may add a second step.

The open night

Beads on a thread

Back into the air

Draw the leaf before or after your command. Add one label.

leaf · water vapor · condense · dew · evaporate · first · then

First, ... tell the leaf what to do before dew forms

Then, ... tell what to notice on the cool leaf

After sunrise, ... tell what to watch as the leaf warms

Read your sentence. Does it tell what to do, using a command such as Cool, Wait, Look, or Watch?
