

The Spoon They Forgot

Little Wonderer mixed up a bowl full of goo,
two scoops of white powder, one splash of water too.
Push slow, and your mitten sinks down with a sigh.
Push fast, and it's hard as a rock. My, oh my!

"It's grains," said the big one, "too tiny to see,
all slipping on water as slick as can be.
Go gently, they glide past each other with ease.
Go quickly, they jam like a crowd in a squeeze."

So the little one rolled it, round, round, in a ball,
and it looked dry and cracked, like no goo at all.
But the moment it stopped, the ball came undone
and dribbled away in a puddle of fun.

"So is it a liquid, or is it a rock?"
Big Wonderer shrugged. "It depends on the knock."
They argued till supper, both sure they were right,
while the spoon they forgot sank slowly from sight.
