

The notebook remembers what eyes forget.

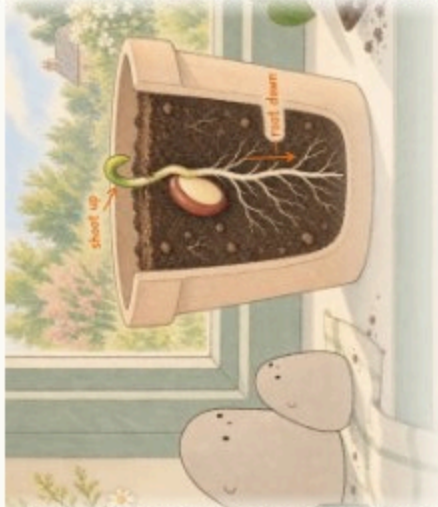

"It looks the same," says Little Wonderer. Big Wonderer opens the notebook. Yesterday's mark sits lower than today's tip. Notes catch slow change.

Leaves open a quiet kitchen.

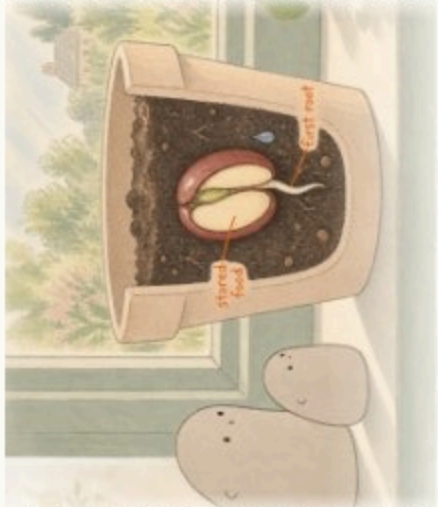

Leaves unfold in the light. They use light, water, and carbon dioxide from the air to make food. Now the plant can make more of what it needs.

Roots read gravity like a map.

With water, air, and enough warmth, a root tips out first. It grows down with gravity. A shoot climbs toward light. Two directions from one quiet start.

Breakfast was packed before sprouts.

A bean rests in an open hand. "Is anything in there?" Inside, a tiny plant waits. Stored food will help it begin before leaves can cook new food.

WONDER TOGETHER / DAILY

A bean becomes.

The quiet work of growing

One leaf. Six steps. A story that keeps going.

GRADE 2

Tiny seed. Big secret.

Make a little book.

1. Print one-sided: US Letter, portrait, actual size / 100%. No fit. Headers/footers off.
2. Fold long edge to long edge; reopen. Fold short edge to short edge, then in half again. Open: eight boxes.
3. Cut only the solid center line across the middle two boxes. Keep the outer boxes joined.
4. Refold long edge to long edge, print outside. Push ends together to open a diamond, then a cross.
5. Wrap into a book with page 1 in front. Follow pages 1 to 8.

Pictures are simplified and not to scale. Look closely, wonder, and pause whenever you like. Fold once. Gigggle once.

They look back at the beginning. Did the bean need open leaves to start? Inside, the tiny plant already had stored food — a lunch packed before the first leaf.

They sit by the window. Growing takes time. "What might change next?" Little Wonderer keeps a new question for tomorrow.

Save one question for tomorrow's window.

The beginning still had lunch inside.
