Longer by how much?

The note inside. · Curiosity day

Name _____ Date _____

A comparison model, not two measured piano strings. Compare length while imagining the material, thickness, and tension stay the same.

PRETEND DRAWING LENGTHS · CENTIMETERS

Line	A	B
Length (cm)	24	9

These are invented drawing lengths. Do not measure the painting or real piano strings.

1. Line A is 24 cm long. Line B is 9 cm long. How much longer is A?

24 − 9 = _____ Show your thinking.

2. Imagine drawing A and B end to end. What is their total length?

24 + 9 = _____ Show your thinking.

3. Little erases 6 cm from line A. How long is that line now?

24 − 6 = _____ Show your thinking.

Sketch two bars that start at the same place. Show which part is the extra 15 cm. A sketch need not be actual size.

WONDER DAILY

The note inside.

One small press

One key sinks beneath Little's hand. A note rings through the museum. "Was it hiding in there?" Little asks. Big listens beside the bench.

A hidden tap

An enormous model gives them a peek. A key tips; connected parts lift a felt-covered hammer. Tap! The hammer strikes a string and comes away.

After the tap

The hammer has fallen back, but the string is not still. It quivers: back and forth, back and forth. That quick motion is vibration.

The wood joins in

Little follows the same string to a wooden bridge. The bridge carries vibration into a broad soundboard. That wood vibrates too, moving more air.

Two lengths to notice

Two strings stretch across another model. One is longer. If everything else stays the same, the longer string vibrates more slowly and sounds lower.

Keep the path

With the pedal up, Little releases a middle key. A felt damper hushes its strings. Little sketches key, hammer, strings, wood.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

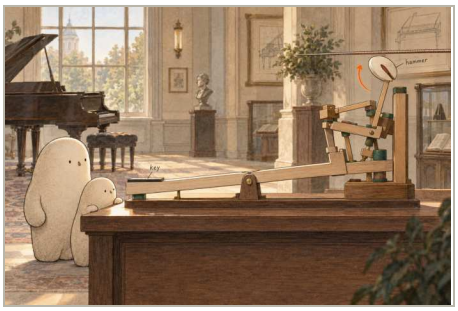

4 Fold into a book. Page 1 goes on the front!

Give the note a path.

The note inside. · Curiosity day

Name _____ Date _____

Choose one picture from Little's search. Tell what moves and what happens next. Draw or write a clue that helped you understand the note.

A hidden tap

The wood joins in

Two lengths to notice

Draw one detail from your scene. Add an arrow or a label to show a movement or a difference.

key · hammer · string · vibration · bridge · soundboard · pitch

When a key moves, … What does the action help the hammer do?

The soundboard helps because … How does the broad wood help move air?

If only the string's length changes, … Which length could make the lower sound?

Read it together and point to the detail your words explain. If you are writing, check the first capital and the ending mark.
