WONDER DAILY

Shadows at Noon

A morning question

Little Wonderer found a long shape beside a standing stick. It was a shadow: a place where the stick blocked sunlight, the light from the sun.

Save the tip

Little took a piece of chalk, a soft stick for making marks. "First mark the tip," said Big. Little drew a small line where the shadow ended.

A smaller patch

At noon, the middle of the day, they came back. The wooden stick had stayed in place, but its shadow had changed. "It is short and crisp!"

Follow the light

"Which way does it point?" asked Big. Little studied the ground. Sunlight reached one side of the stick. The shadow stretched away on the other side.

Compare the marks

Little marked the new tip with chalk. They used the same measuring stick to check both lengths.

A clue to keep

In the notebook, Little drew a long line for morning and a short line for noon. Later, when the sun was lower, the shadow would grow longer again.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!
