WONDER DAILY

The note inside.

One small press

One key sinks beneath Little's hand. A note rings through the museum. "Was it hiding in there?" Little asks. Big listens beside the bench.

A hidden tap

An enormous model gives them a peek. A key tips; connected parts lift a felt-covered hammer. Tap! The hammer strikes a string and comes away.

After the tap

The hammer has fallen back, but the string is not still. It quivers: back and forth, back and forth. That quick motion is vibration.

The wood joins in

Little follows the same string to a wooden bridge. The bridge carries vibration into a broad soundboard. That wood vibrates too, moving more air.

Two lengths to notice

Two strings stretch across another model. One is longer. If everything else stays the same, the longer string vibrates more slowly and sounds lower.

Keep the path

With the pedal up, Little releases a middle key. A felt damper hushes its strings. Little sketches key, hammer, strings, wood.

Make a little book

1 Fold it into 8 boxes. Open it flat.

2 Fold short end to short end. Cut the thick line. Open it.

3 Fold the long way, pictures out. Push the ends in.

4 Fold into a book. Page 1 goes on the front!
